Syrian | Cairo, Egypt - Remote

SUMMARY

Front-End Web Developer focused on building fast, responsive, and scalable applications using React.js, React Native, and Firebase as a full back-end solution (BaaS). Passionate about writing clean, maintainable code and creating intuitive UI/UX experiences.

Currently converting my e-commerce project LaCité into a mobile app using React Native. Open to remote opportunities where I can contribute to meaningful, user-focused projects.

EXPERIENCE

Front-End Developer Firebase Baas LaCité (E-Commerce Web App) ↗	04/2025 - Present
<ul style="list-style-type: none">Developed a complete online store using React.js and Firebase (Firestore, Auth, Hosting).Built a custom admin panel for managing products (add/delete).Integrated Cloudinary for image uploads and WhatsApp API for order checkout.Designed a fully responsive UI for mobile, tablet, and desktop.Currently migrating the project to React Native as a mobile app.	
Front-End Developer To-Do App (Task Manager) ↗	03/2025 - 03/2025
<ul style="list-style-type: none">Designed and developed a minimalist React.js to-do app using Vite.Implemented localStorage to store tasks and manage their state effectively.	
Front-End Developer FoodDel (Food Delivery Web App) ↗	01/2025 - 03/2025
<ul style="list-style-type: none">Built a user-friendly delivery interface with product filtering and cart functionality using React.Created modular components for clean UX and easy product browsing.
